

# Professional e-Portfolio: Using Padlet to Map a Learning Journey for Regulated Practice

Philip BRIGHT<sup>1</sup> PhD  
Monica ABROSIMOFF<sup>1</sup>

<sup>1</sup>European School of Osteopathy, Maidstone, UK

## Use of e-Portfolios in healthcare

- Offer great potential - supporting reflective learning in healthcare education and practice.
- Platform of cross-sectional material - evidence of learning journey and professional development.

## Conclusion

- The Padlet e-Portfolio optimises and showcases student professional development.
- Engages students as more active partners in their academic journey.
- Helps develop: critical appraisal; reflective practice; recognition of bias and clinical uncertainty.
- Provides a digital profile that can be taken into the workplace.

## Why Padlet?

- > Easy!
- > No more little pieces of paper
- > Easy to reference
- > Demonstrate CPD- setting up for the future
- > Searchable
- > App- allows you to add access from your phone or tablet, anytime
- > Collaboration with others

## Professionalism theme - Integrated Masters in Osteopathy programme - ESO

- Students expected to reflect on Osteopathic Practice Standards (OPS) that inform curriculum.
- Key evidence - both curriculum led and extra-curricular activities -
- Demonstrates students' development into model professionals.
- The Padlet 'shelf' aligns to regulatory framework with multimedia capacity.

CPD Scheme

## e-Portfolio Software

- Various software tools offer portfolio solutions - Web 2.0 worth exploring.
- Regulated practice - codes of professional behaviours organised into domains.
- e-Portfolio structure should reflect these domains.
